BEST SELLERS

How to navigate Stamperia's extensive catalog to find the best products?

To assist, we've curated a Best Sellers section featuring our most popular items, including Stencils, Rice papers, and Moulds. Additionally, we've introduced Crafty Shapes, a line of laser-cut wooden shapes ideal for various crafting projects.

Explore our Best Sellers in the following pages

QUICK RESIN

BEST SELLERS

Stamperia

● **KEN14**

NEW

1:1 BICOMPONENT - WHITE

2 x 150 ml - 2 x 5.07 fl oz

- Epoxy resin that dries in 1-2 hours according to thickness. Inside: Component A and B (2x150ml - 2x5.07 fl oz), dispenser, pair of gloves, spatula and the user manual.

HOW TO USE

0. What's Included in the Box?

Refer to the contents list provided on the packaging to ensure all necessary components are present:

- Component A (150 ml - 5.07 fl oz)
- Component B (150 ml - 5.07 fl oz)
- Pair of disposable gloves
- Stirring stick
- Graduated measuring cup

1. Instructions

Preparing the Work Area

- Choose a well-ventilated and airy environment for working.
- Use a horizontal work surface, covered with a plastic sheet to protect against spills.
- Wear protective gloves during the entire process for safety.

2. Measuring and Mixing

- Stir Component B thoroughly before combining it with Component A.
- Mix the components in a 1:1 ratio.
- Use a wooden spatula to slowly stir the mixture for approximately two minutes until a homogeneous mass is achieved.

3. Pouring

- Clean the mold with alcohol before use
- Slowly pour the mixed resin (A+B) into molds.
- Stamperia Silicone Molds and Soft Molds are compatible with Quick Resin.

For objects thicker than 1 cm, pour the resin mixture in layers to ensure proper curing.

GUIDELINES FOR USAGE

4. Reaction Process

- Once mixed, the resin will begin to harden, generating heat as it cures.
- The thicker the resin layer, the more heat it produces.
- The temperature of the resin can reach 70-80°C, in the vessel 90-110°C
- Pot life (usable time after mixing): 15-20 minutes at 25°C.

5. Curing and Drying

- Allow the resin to cure at room temperature.
- Hardened resin can typically be removed from molds within 1-2 hours.
- Thin layers (less than 1 cm) may remain flexible for shaping.
- The resin reaches significant hardness within 24 hours and achieves full hardness after 3 days.

6. Coloring (optional)

The resin mixture can be colored before it hardens using compatible pigments or dyes. Use 1-2 ml colorant/ 100 ml resin. Excess colouring may cause the resin to remain flexible.

7. Cleaning Tools

- Remove uncured resin from surfaces using alcohol.
- Clean mixing tools immediately with alcohol and kitchen paper to prevent residue buildup.

SILICON MOULDS

BEST SELLERS

Stamperia

FLEXIBLE AND WASHABLE, THESE MOULDS FEATURE DETAILED DESIGNS FOR CREATING 3D SHAPES USING MATERIALS LIKE CERAMIC POWDER AND SOFT CLAY AND THE VERY NEW QUICK RESIN.

SILICON MOULDS

cm 14.8 x 21 - 5.8" x 8.3"

- Flexible and durable silicone mold
- Perfect for creating detailed shapes
- Ideal for use with resin, clay, and other mediums
